

LEAN MAINTENANCE: STRATEGY TO EXECUTION

Building a Proactive Maintenance Organisation

1-DAY PROGRAMME WITH ALP BORA + 1-HOUR PERSONALISED CONSULTATION

PUBLIC: Anyone directly involved in equipment reliability and performance: Maintenance Team Leaders, Maintenance and Production Engineers, Technicians, Continuous Improvement Officers and more.

PART 1:

MAINTENANCE STRATEGY

- Team building workshop
- Define maintenance strategy: different levers to consider
- Overview of different maintenance tactics: reactive, preventive, predictive and proactive
- Introduction to Precision Maintenance : doing the right maintenance at the right time

WORK MANAGEMENT & SPARE PARTS

- Maintenance Program : assets, hierarchy and criticality
- Identification, Planning and Execution triangle
- Best-practices in CMMS/ERP use
- Learn the benchmarks on spare parts and inventory management with examples on 5S and kitting for maintenance work
- Workshop : Waste Elimination in Maintenance

{LUNCH BREAK}

PART 2:

DAY IN THE LIFE OF A PROACTIVE MAINTENANCE TEAM

- High Performance Culture : Systems, Processes and Behaviours
- Notification and Work Order Management
- Backlog Management and Proactive Planning
- Difference between Planning & Scheduling
- Daily Management System (DMS) of Supervisors

KPI & RELIABILITY

- Winning Conditions for Maintenance Execution
- Reliability measures (MTTR & MTBF)
- Identify the required Key Performance Indicators to pinpoint where actions need to be taken to track and to improve maintenance performance.
- Reliability Centered Maintenance (RCM) and Reverse RCM for right maintenance strategy

Throughout the seminar, the following topics will be covered:

- Stress-test your maintenance strategy and define objectives to propel your organization forward
- Transform strategic goals into actionable plans
- Cascade and empower your teams with accountability for the results
- Implement a governance to ensure the successful execution of the strategy
